

# Computer Science Seminar

## Transforming heavy industries using computer vision and drone technology

Ravi Sahu

Strayos

This presentation will give an overview of how the advancement in computer vision technologies are creating innovative solutions in heavy industries like Mining, Construction and Oil& Gas by converging the drone sensors and generating real-time visual intelligence for day to day operations.

**Bio:** Ravi Sahu is a founder and CEO of Strayos. Before founding Strayos, he spent more than 10 years working globally with Fortune 500 companies in various roles, from product management to building successful teams for large digital transformation projects. He is also a product mentor and advisor to several venture-backed companies. He holds an MBA from Washington University in St. Louis and a bachelor of engineering degree in Computer Science from a top-ranked university in India.

**Date: January 22, 2018**

**Time: 10:00 am - 10:50 am**
