

Seminar Comp. Sci. Dept.

QuickSort, an Introduction

Ricardo Morales

July 13th Wednesday, 1:30 to 2:30 am

Venue - Computer Science Building - Room 327

Abstract - "QuickSort is the most widely used sorting algorithm, and it is considered the most efficient in practice.

In this lecture we will explore the development of this often misunderstood algorithm, show how the concept of recursion can provide us with a better insight into understanding it, and open a window to appreciate its beauty."
