

# Computer Science Dept. Seminar Series

## How to Make Your Innovative Idea Work for YOU

Vera Anderson, Missouri S&T

Mar 5 Tuesday, 12:30 to 1:30pm

Venue - CS 209

**Abstract** - Did you know there is a way to capture all of the benefits from your innovative idea without any upfront cost? We can help you to realize the full potential of your idea at the Technology Transfer and Economic Development Office! Disclosing your innovation to the university is a simple process that can lead to patenting and commercialization of a technology. In this seminar you will learn about technology transfer at Missouri S&T and incentives that the university has in place

**Brief Bio** - Vera Anderson is a Licensing & Patent Associate at Missouri S&T. Her responsibilities include managing intellectual property which includes triage, due diligence, valuation, and also managing marketing effort for patentable technologies. She received a Masters degree in Information Science and Technology from Missouri S&T in 2006. She has also contributed to several student start-ups at Missouri S&T.
